Question 1. Which activity best supports active recall?
A) Rereading the same page
B) Highlighting every sentence
C) Testing yourself without looking at notes
D) Copying the notes word for word
Answer: C
Explanation: Active recall means retrieving information from memory instead of only reviewing it.

Question 2. What does a question bank store?
A) Only website colors
B) Questions, choices, answers, and explanations
C) Browser history
D) Passwords
Answer: B
Explanation: A question bank stores the structured material needed to run quizzes and give feedback.

Question 3. What is the purpose of feedback after an answer?
A) To hide the correct answer
B) To help the learner understand and improve
C) To end every study session
D) To remove the question
Answer: B
Explanation: Immediate feedback connects the learner's answer with the explanation while the idea is fresh.

Question 4. What does a PDF upload preview allow the learner to do?
A) Review extracted questions before saving them
B) Delete the operating system
C) Change their browser password
D) Skip all questions
Answer: A
Explanation: The preview is a safety step so the learner can inspect extracted content before adding it to the bank.

Question 5. Which result is shown after a completed quiz?
A) The computer's battery level
B) The learner's score and percentage
C) The PDF file size only
D) The app's source code
Answer: B
Explanation: The quiz result summarizes how many questions were correct and the corresponding percentage.
